

# Mareddy Karthikeya

+91 6302310210 — mareddykarthikeya@gmail.com — Hyderabad, Telangana

## Professional Summary

---

Full-Stack Engineer and UI/UX Designer specialized in bridging the gap between user-centric design, robust development, and scalable cloud infrastructure. Proficient in the MERN stack and Figma design systems, with hands-on experience deploying automated, highly available architectures using AWS and Docker.

## Education

---

**Neil Gogte Institute of Technology, Osmania University - Hyderabad**  
Bachelor of Engineering in Computer Science (AI & ML)

June 2026  
CGPA: 7.4

## Experience

---

### Backend Developer — Rablo

Feb 2026 – June 2026

Lucknow

- Working on a real time Mern based Gym management App where it helps users to buy plans and do a more lot in the App.

### UI/UX Designer — Soulux

Oct 2025 – Dec 2025

Hyderabad

- Conducted user research and developed wireframes and prototypes.
- Built scalable design systems using Figma.
- Collaborated in Agile environments to deliver user-centric designs.

### Full Stack Developer — Algohire

Sep 2025

Hyderabad

- Built responsive interfaces using React.js and mostly worked in the Backend parts.
- Integrated APIs and ensured that everything worked smoothly and perfectly.

### MEAN Stack Developer Intern — Sharvi Infotech

March 2025 – July 2025

Hyderabad

- Developed REST APIs using Express.js for HBL (Hyderabad Batteries Limited) for there Train Reservation System.
- Implemented JWT-based authentication and middleware security.
- Designed MongoDB schemas using Mongoose.

## Skills

---

**Cloud & DevOps:** AWS (EC2, VPC, IAM, S3, CloudFront, Lambda, CloudWatch, Route 53, ECR), VPC Networking (Public/Private Subnets, NAT Gateway, Route Tables, NACLs, Security Groups), Load Balancing & Auto Scaling (ALB, Target Groups, Scaling Policies), Serverless (Lambda, EventBridge)

**Oracle HCM ERP:** Oracle Fusion HCM (Conceptual) — Core HR, Absence Management, Payroll, Workforce Compensation; ERP Business Process Understanding; HRMS Concepts; Employee Lifecycle Management; Leave Attendance Management; Onboarding Workflows; UAT Support; Functional Configuration Concepts

**Containerization:** Docker, Dockerfile, Docker Compose, Volumes, Networking

**Backend Development:** Node.js, Express.js, REST APIs

**Databases:** MongoDB, Mongoose ORM

**UI/UX:** User Research, User Personas, Journey Mapping, Wireframing, Prototyping, Interaction Design, Information Architecture, Usability Testing, Heuristic Evaluation, A/B Testing, UX Metrics, Design Systems, Responsive Design, Low-Fidelity Mockups, High-Fidelity Mockups, Stakeholder Communication

**Tools:** Git, Postman

## Projects

---

### **AWS Cost Optimization using Lambda & EventBridge**

- Built a serverless automation system on AWS to identify unused or stale resources.
- Implemented Lambda functions using Python and boto3 triggered via EventBridge.
- Scanned EC2, EBS, and S3 to detect idle resources.
- Integrated CloudWatch Logs for monitoring.

### **Highly Available Web Application using VPC, ALB & Auto Scaling**

- Designed a VPC with public and private subnets.
- Deployed EC2 instances behind an Application Load Balancer.
- Configured Auto Scaling Groups based on traffic.
- Applied Security Groups and IAM roles for secure access.

### **SilentSOS (MERN Stack)**

- SilentSOS is a mobile safety app built with the MERN stack and React Native that sends silent SOS alerts via Twilio SMS with real-time GPS tracking. Live location updates every few seconds, with Google Maps integration for easy access and future features like nearby police station alerts and smooth scrolling interactions.

### **YOLO Object Detection Model**

- Integrated a YOLO-based object detection model into a web application. Built a backend using Flask and connected it with React.js for real-time object detection using a camera feed.

### **Chat Application (MERN + Socket.io)**

- Developed a real-time chat application using React.js, Node.js, Express.js, and Socket.io for instant messaging. Implemented JWT authentication, real-time notifications, and a responsive UI for a seamless user experience.

### **AI Asset Management Dashboard (Figma)**

- Interactive prototype for managing laptop assets with real-time tracking and AI-driven predictive maintenance insights
